create a new repository on the command line

```
echo "# new git repository" >> README.md

git init

git add README.md

git commit -m "first commit"

git branch -M main

git remote add origin { your repo https link or ssh address}

git push -u origin main
```

push an existing repository from the command line

```
git remote add origin { your repo https link or ssh address}

git branch -M main

git push -u origin main
```
